Card payments coming soon.

Where your materials go to be recycled

We focus on collecting high quality materials that can be recycled locally. This is better for the environment, the economy and creates local jobs.

Paper is recycled
into egg boxes.

Glass is melted
down and used to
make new bottles
for local products
such as Bulmers
and Baileys.

Plastics are used
to make pipes for
the agricultural,
civil engineering
and construction
industries.

What to expect when you visit

At our centres we have containers for different recyclable materials. To make your visit easier and quicker please **sort your materials at home**. All items for recycling should be clean. Our staff will be happy to help you in any way they can.
